BERLIN

A city like no other. The dynamo was invented here, the first electric tram in the world ran here - and here, for the first time, theatrical make-up was systematically manufactured. When the first German color movie was produced in 1939, the man who later founded KRYOLAN developed the innovative make-up colors required. Quite a creative accomplishment, especially for that day and age.

It has been a part of the exciting tradition from which KRYOLAN has successfully developed. Founded in 1945, the company has served its clientele continuously under one central maxim: to provide reliable support in the form of innovative, effective and safe make-up preparations for make-up artists and actors. More exactly: for the skin of actresses and actors. Theater work demands a great deal from actors' skin: day after day make-up must stand up under the effects of adhesives, bald caps and special effects. And despite all this professional stress, we expect actors' skin to naturally glow again, without blemish. These strict expectations mean that our make-up clients simply must trust in the compatibility of the products that they use every day.

This is where KRYOLAN comes in, with its professional make-up preparations - which for years have spread far beyond the bounds of pure theatrical make-up. These are preparations that have been clinically tested - and are effectively oriented to the make-up artist's practical work.

On the stage, at film and TV productions and for photography: whenever make-up is needed for professional applications, KRYOLAN preparations are always on the scene. Actors and make-up artists from all over the world have learned to appreciate the reliability, extraordinary compatibility and complex practicability of KRYOLAN preparations - especially for long-term applications. Cosmeticians and visagists have likewise discovered the considerable benefits of professional KRYOLAN make-up specialties for themselves and their clientele.

All professionals are impressed by the astonishing diversity of KRYOLAN preparations and color shades and by their wonderful contributions to creative, artistic work.

Our camouflage preparations - Dermacolor and Dermacolor light - have proved highly successful and have been widely accepted around the world. Not only for the concealment of skin-color anomalies, these products also demonstrate their outstanding, unparalleled results as completely non-problematic make-up. For use on daily basis.

Face and body painting artists have been especially successful in working with KRYOLAN Aquacolor. Children all over the world have made their choice for our unmatched Aquacolor wet make-up.

The chemists in the KRYOLAN lab, our microbiologist and the rest of the crew of KRYOLAN - supported by prominent dermatologists - are all hard at work to ensure the widely recognized quality of KRYOLAN preparations.

All of the above have made us the leading international company for professional make-up, with our own periodical - "Lebendige Maske" - and with highly respected seminars for the ongoing training of make-up artists.

You can easily find much more in KRYOLAN: A creative, reliable partner who is always on call when you need help in the field of professional make-up:

- On a highly individual basis
- With the expertise you are looking for
- On the basis of practical experience stretching over almost 60 years
- As part of the exciting tradition of Berlin

Foundation & Cream Make-up

KRYOLAN foundations are compositions of ingredients that are especially kind to the skin. Dermatological tests have verified their outstanding skin compatibility. Experienced specialists have developed KRYOLAN foundations especially for make-up artists assigned to film, TV, video and photographic work. Wherever highlighting of natural beauty is desired, these professional make-up preparations have become an indispensable tool. Foundations are thinly and evenly applied with a fine texture latex sponge.

Cream and grease make-up should be set with Translucent Powder. KRYOLAN Make-up Remover, Cleansing Gel, Cleansing Milk, Hydro Cleansing Oil and AquaCleans are especially effective for gentle removal of cream and grease make-up.

Ultrafoundation

Ultrafoundation is a cream foundation specially formulated for the most demanding make-up expectations. As a result of its excellent covering quality, Ultrafoundation is also effective as a corrective make-up. Transparent application of Ultrafoundation is also suitable for photographic work. Its matt finish provides models with a naturally attractive appearance.

The Ultrafoundation formulation contains advanced ingredients that are recognized for particularly good skin compatibility. This formulation contains no mineral oil, to assure that the skin readily absorbs the make-up.

This foundation is available in a wide range of more than 70 shades.

Foundation & Cream Make-up

Ultra Fluid Foundation

For many skin types, Fluid Foundation has proved outstanding in providing a gentle, smooth and uniformly applied make-up. Ultra Fluid is distinguished by slightly enhanced covering quality, without loss of its transparent appearance. Glass bottle with applicator.

Art. 9130 Details 30 ml
 Art. 9132 Details 150 ml

These foundations are available in a range of more than 48 shades.

Ultra Foundation Stick

Foundation in stick form, without mineral oil, formulated according to the latest insights into ingredients engineering. Designed to meet the most demanding professional requirements, our foundation contains additives soothing to the skin, assuring maximum comfort.

Application of Ultra Foundation is soft and supple, but still produces a natural matt look. The base and the micro-fine pigments used in this make-up mean that Ultra Foundation Stick is perfectly suited for flawless camera results.

This preparation, in other words, is the make-up for film, TV and photography.

Art. 9047 Details 10 g

Foundation & Cream Make-up

Ultra Cream Powder

A natural, gentle make-up speciality for TV and film applications. Application of Ultra Cream Powder is effortless, also by its extremely ultra-fine particle consistency. Its silky-soft, hydrophobic powder film also ensures lasting adherence to the skin. Models have discovered Ultra Cream Powder to be exceptionally friendly to their skin. Powder particles coated through innovative techniques, as well as new colors - in conjunction with sophisticated micronization technology - have enabled the development of Ultra Cream Powder. In addition to the shades on the color chart, Ultra Cream Powder is also available in translucent.

 Art. 59052 Details 10 g Refill

Dual Finish

Creamy, soft-feeling make-up in an elegant compact, for moist or dry application. In dry form, this preparation is similar to cream powder and is effective in lightly tinting and shading the skin. This exclusive formula is best applied dry and followed by a moist latex sponge setting and finish for a perfect foundation application. Moist application enables greater covering quality and color intensity on the skin. Dual Finish can be gently removed with AquaCleans, or effortlessly with soap and water.

Foundation & Cream Make-up

Perfect Matt

Perfect Matt is a velvety gel that acts to smooth out irregularities on the surface of the skin. At the same time, it forms a film that serves as an outstanding base for various make-up preparations – and that greatly enhances the durability of the make-up applied. The gel-like consistency of Perfect Matt also increases the moisture resistance of the foundation.

Perfect Matt is the ideal matting agent for a face before it is made up. It is especially suited for the natural look in professional photography.

The vitamin complex contained in Perfect Matt means at the same time that it effectively cares for the skin.

Shimmering Event Foundation

Shimmering Event Foundation

A very light and gentle cream foundation for appealing light effects. Its shimmering and luminescent pearlescent pigments reflect light in a truly magical way and make this foundation especially ideal for application as transparent evening make-up. Shimmering Event Foundation was formulated with advanced emulsifiers - constituents effective for use with sensitive skin and for assurance of great comfort. The integrated sunscreen factor SPF 15 makes Shimmering Event Foundation also the perfect choice for applications under strong sunlight. This product is available in six nuances, presented in attractive dispenser bottles.

Art. 9092 Details 50 ml Dispenser

Tinted Moisturizer

Tinted Moisturizer

An exceptional cream foundation in an elegant dispenser bottle. This unusually gentle foundation, with its translucent effects, produces a fresh and natural impression. It enables picture-lovely results on the catwalk - and also for applications with photography and film. The integrated sunscreen factor SPF 15 also makes this make-up ideal for use in brilliantly sunlit ambience. Tinted Moisturizer users are particularly fond of its pleasant feeling and its comfort on their skin.

Cream Make-up Wet Foundation

Color Chart for Perfect Body Foundation

Perfect Body Foundation

PERFECT BODY FOUNDATION The Activity Make-up • Dansproof

Dansproof Perfect Body Foundation (PBF) is an exceptionally effective covering make-up cream for décolleté and the rest of the body – and which still makes a very natural impression. This foundation lasts for many hours, even under conditions of extreme stress, and is moisture-resistant. Perfect Body Foundation is also the ideal make-up for athletics, ballet and dancing. PBF is dansproof.

PBF is generously applied with a slightly moistened make-up sponge and then uniformly distributed. After drying, the foundation can be gently smoothed out with a soft cloth or the hand. PBF is easily removed with AquaCleans or with soap and warm water.

Cake Make-up

Moist-applied, color-intensive make-up in the form of compact powder. The base consists of costly constituents of soothing skin creams with moisture regulators.

Cake Make-up is specially designed for application to the neck, décolleté and body. The preparation-specific base has an hydrophobic effect and also resists transpiration.

Cake Make-up is applied, thinly and evenly, by a fine-pored, moist make-up sponge. The applied make-up dries quickly and should then be buffed with a dry towel. Cake Make-up is smudge-proof and does not require powdering.

Easily removed with AquaCleans, or with soap and water.

Cake Make-up is available in a variety of more than 42 shades.

Art. 1120 Details 40 g

Three powders are a charm. That's why KRYOLAN offers you three for make-up setting. Three that are indispensable:

- KRYOLAN Translucent Powder
- KRYOLAN Micro Silk Powder
- KRYOLAN Anti Shine Powder

These products have been specially designed for setting and matting of professional make-up.

KRYOLAN Translucent Powder was especially created for this application. It is characterized by its extraordinary ultrafine particle consistency and color neutrality, which enables its ideal setting effects.

KRYOLAN Translucent Powder long ago became the finish of choice for professional make-up work for the stage, films, TV, video work, photography and the catwalk. Its powerful absorption characteristics reliably guarantee the make-up setting that professionals require. The individual ingredients of Translucent Powder provide the required texture and make the powdered foundation smudge-proof. The essential ingredients here include microfine modified rice starch, in the quality known as amyllum non mucilaginosum, which assures transparent, natural-appearing matting of any make-up with which it is used. Superfine talcum in pharmaceutical quality, and its carefully selected micro-constituents with ultra purity and quality, effectively sets the cream basis of any foundation. Under all conditions, it fully employs its superior effects to assure perfect make-up.

Make-up Setting:

- Powder
- Spray

KRYOLAN Micro Silk Powder is incomparable with its gentle softness. While setting the make-up it further enhances the comfort experienced in the application of professional KRYOLAN products.

KRYOLAN Anti Shine Powder, with its special, enchanting, natural matt effects, can be used alone or in addition to other preparations. Its primary ingredient has a particle size of only 9 microns, with a micro-crystalline structure. The resulting, extraordinarily weak light reflection of KRYOLAN Anti Shine Powder provides an optimal matt effect. Owing to the extremely tiny size of the particles (one gram has a surface area of 1.6 sq. meters), Anti Shine Powder develops extremely high absorption power: which consequently means that it has also gained widespread acceptance in practice as an outstanding setting powder.

KRYOLAN labs have also developed the unique preparations Fixing Spray and Ultra Setting Spray, as additional fixing agents.

These special preparations additionally enhance the surface protection provided by applied make-up and enable even greater smudge-proof characteristics. As a result, they protect clothing from make-up spots. After application of KRYOLAN Cream Foundation to the face, KRYOLAN Translucent Powder is then carefully applied, with final application of KRYOLAN Setting Spray or Ultra Setting Spray.

In application with wet make-up, these setting sprays are sprayed directly onto the dried make-up. After drying, the make-up protected in this manner will not smudge or rub off. These setting preparations likewise afford additional protection against transpiration and moisture from weather.

Make-up Setting:

- Powder

Micro Silk Powder

Transparent light powder with silk protein for matifying and for setting make-up after application. Its micro-fine particles make it an ideal preparation for high definition camera technology as well.

Innovative ingredients have anti-inflammatory and anti-bacterial effects and protect from harmful ultraviolet radiation. Sun protection factor = 9.

Art. 19700 Details 20 g Jar

Translucent Powder

This classical powder preparation is characterized by its fineness and high degree of color neutrality.

Translucent Powder contains a large share of modified rice starch, unique in its specification. It assures great absorption power and enhances the durability of make-up on the skin. Translucent Powder is outstandingly suited for all professional applications. The fine powder particles produce a comfortable, pleasant wearing feeling.

Art. 5700 Details 60 g Jar
 Art. 5703 Details 20 g Jar
 Art. 5704 Details 500 g Refill Package

Anti Shine Powder

Anti Shine Powder is a special matt powder, similar in its way to Asian rice powder. At the same time, however, Anti Shine Powder prevents unwanted dull effects and creates a pleasant feeling on the skin.

Anti Shine Powder is colorless and is especially effective for the additional matting effects that become necessary during long shooting sessions.

Art. 5705 Details 30 g Jar

Make-up Setting:

- Spray

Fixing Spray

KRYOLAN Fixing Spray is a special cosmetic preparation for application over make-up. It creates an invisible protective film, which prolongs the life of the make-up and its effects. Fixing Spray is particularly effective for body painting with KRYOLAN Aquacolor and with other wet make-up preparations.

KRYOLAN Fixing Spray is applied thinly and evenly and allowed to dry. The protected make-up is then smudge and rub-proof and withstands even excessively harsh effects and exposure. Setting Spray makes any make-up resistant to cold water and considerably delays the deterioration of make-up on the skin as a result of perspiration.

Setting Spray contains alcohol and should not be applied near eyes or mucous membranes.

Setting Spray can be easily removed with soap and warm water.

Ultra Setting Spray

Ultra Setting Spray is an innovative product for make-up setting.

This fine mist spray is a light setting preparation, with exceptional matt and light effect after application and is most suitable for camera work.

Ultra Setting Spray dependably sets any kind of make-up. Before applying it to cream foundation, the foundation should first be powdered.

The spray is applied thinly and evenly and dries quickly. The protected make-up is then extremely smudge-proof and is resistant to moisture.

Ultra Setting Spray contains less alcohol than traditional Fixing Spray, but should not be applied near eyes or mucous membranes.

Skin Relax Tonic

Our skin often becomes tired and that's when it looks it. And soon enough we clearly feel and see it ourselves. Stressful environmental influences are at cause: vehicle exhaust gases in the big city, industrial emissions, tobacco smoke, fine dust and much more all act to clog skin pores.

Now it's time for a refreshing tonic: time for SKIN RELAX TONIC, which cleanses, revitalizes and invigorates your skin like the dewdrops of early morning.

This biological plant complex – composed from ripe raspberries, selected white grapes, hamamelis distillate (witch hazel), and fresh mint – provides soothing astringency. The other multi-active ingredients allantoin and vitamin E acetate, together with added broad-spectrum natural moisture factor components, bring their vitalizing and moisture-providing effects into play. Your skin will relax and restore itself more with each drop. It will feel secure and protected under the dewdrops of SKIN RELAX TONIC.

Art. 10061 Details 250 ml

Skin Tonic Rosé

A refreshing face tonic for vitalization of the skin after make-up removal. In addition to a highly effective moisture complex, Skin Tonic Rosé contains hamamelis (witch hazel) as well as chamomile. Hamamelis acts to prevent possible irritations to the skin and contributes to natural skin balance with regular application.

Art. 1640 Details 250 ml

Re-Vitalizing

Skin Refreshing Spray

The famous, refreshing mineral Water SURGIVA comes from natural and unspoiled Prà dell'Era springs, at an altitude of 1,134 meters, in the Dolomite mountains of northern Italy.

The slight mineral content of this water and its pH of 6.5 make SURGIVA ideal for cosmetic applications.

SURGIVA Skin Refreshing Spray, by supplying natural moisture, produces a definite revitalizing and refreshing effect on the skin. It is applied from a distance of approx. 30 cm.

SURGIVA is especially effective when applied in atomized form onto finished make-up. The tiniest of setting powder residue is rendered invisible, without reducing the setting effects of the powder. The result: Skin Refreshing Spray highlights a natural impression.

Art. 10090 Details 50 ml
Art. 10092 Details 150 ml

Eye Make-up

The eyes are the key element for an expressive make-up. KRYOLAN's extensive range of creative preparations provide the ultimate tools for the perfect eye make-up.

We have dedicated more than 38 catalogue pages to the area of eye make-up. This comprehensive offering of products, colors and presentations will satisfy practically all professional requirements. KRYOLAN eye make-up conforms to the strict stipulations of European, American and Japanese cosmetic regulations and can be used anywhere in the world. For make-up artists busy on a global basis, this assurance fulfils an essential prerequisite for international work.

Professional eye make-up must satisfy a wide range of requirements: outstanding skin tolerance, exceptional product quality, excellent comfort, unmatched effectiveness and superior suitability for the camera.

Clinical studies have verified the outstanding skin tolerance of KRYOLAN eye make-up.

The microfine pigments in KRYOLAN eye shadows achieve superior results on camera. Even at high resolution, these pigments create a homogeneous appearance on the eyelids. Our technically advanced double micronization process assures a soft, velvety finish, as well as long-wearing application.

The other KRYOLAN eye make-up preparations are formulated according to professional expectations and requirements and are tested by professionals under realistic conditions. These products include KRYOLAN Eye Liner, Mascara, Eyebrow Pencil and AQUA PearlShades. Qualified safety assessments documented the skin tolerance of these products, which have been further confirmed by expert dermatological studies.

Eye Make-up

VIVA
eyes • face • body

VIVA: With a new concept for professional make-up, which means it can be applied wet or dry. This color-intensive, iridescent, and matt product achieves outstanding modern effects: as eye shadow, face decoration, or body design.

When applied dry, VIVA acts like conventional eye shadow. Wet application intensifies its color expression – and VIVA becomes smudge- and weather-proof.

Available as palette refill, single, as palettes 8 and 15 colors.

Eye Shadow

A cream powder for dry application. A new formula-tion and innovative production technology provide gentle application and produce a pleasantly soft feeling on the skin.

The micronized pigments offer the possibility of apply-ing this preparation not only with fashionable trans-parency, but also with vivid color emphasis. Excellent durability on the eyelids makes this KRYOLAN product exceptionally well-suited for professional application.

These shadows can be obtained in more than 88 shades. Your KRYOLAN dealer holds a comprehensive color range on stock.

KRYOLAN Eye Shadow is available in an elegant round container with window and as palette godet.

Shades

Shades are KRYOLAN's Eye Shadows and Blushers in 10 different new standard combinations in an elegant five color palette. New formulations and production technologies allow an outstanding smooth application and create a comfortable soft feeling on the skin. Micronized color pigments and the micronization of the end product ensure a high quality standard. Therefore, the product is transparent and fashionable, but it can also be applied intensely. The excellent long lasting stay on the eyelid makes this KRYOLAN product the right product for professional use.

Cake Eye Liner Sealer

Cake Eye Liner Sealer is an innovative preparation created especially for the professional make-up artist to effectively help him or her provide perfect eye make-up.

Cake Eye Liner Sealer seals the applied eye liner, enhances its durability and improves moisture resistance.

The sealer is thinly applied over the eye liner after it has dried. This sealer preparation can, however, also be directly employed to line the eyelid: the brush is first wet with Cake Eye Liner Sealer and the moist brush is then used to apply Cake Eye Liner.

Art. 1096 Details Combination Sharpeners for Kajal Pencils and Eyebrow Pencils

Skinliner

Skinliner represents a new concept for precise make-up lines on the face and body – and also serves as a perfect lip- and eye liner.
Skinliner is applied easily and conveniently. The soft silicone tip draws a precise line, and the color ink demonstrates excellent adherence to the skin, without running. Waterproof. KRYOLAN Eye Make-Up Remover is recommended for removal of waterproof Skinliner.
Note: After long use of Skinliner, the soft silicone tip can wear out. To extend the life of the liner, just pull out the tip, turn it around, and replace it. This restores the original precision.

Blusher Light and Shadow

A successful facial make-up depends on the vitality of the creation. A harmoniously balanced interplay of light and shadow produces the interesting effects that are required.

Blusher lends an additional, warm color expression to facial make-up. The application of highlights and shadow heightens the accentuation needed to perfect the overall impression.

The shading obtained here is most efficiently produced with preparations in powder form, since powder is excellent in rendering soft transitions on the human face. It is essential, though, that the applied preparation offers the fineness required for high-resolution cameras.

KRYOLAN Blusher is a micronized preparation.

Lip Make-up

Lip Rouge

Success with lipstick depends to a great degree on excellent skin compatibility. For the professional make-up artist, a top priority in working with lipstick goes to color intensity, durability, and capability for universal application.

KRYOLAN lipstick preparations contain superior quality constituents, together with Vitamin E for skin care. Skin-care effectiveness results from increased concentration of Vitamin E, which stimulates the skin's repair mechanism. The combination of various wax substances provides a consistency that assures soft, smooth and pleasant application, even under cool climatic conditions. In formulating Lip Rouge, KRYOLAN chemists have taken care to extensively avoid allergic potential, which means that Lip Rouges contain no lanolin. Clinical studies have confirmed their outstanding skin compatibility.

KRYOLAN Lip Rouge is available in 3 different quality types:

KRYOLAN offers the traditional, long-proven Classic formulation in a great number of successfully used colors. Lip Rouge Classic creates a matt impression and offers exceptionally good durability. The Fashion line was formulated especially for professional beauty applications. Fashion Lip Rouge is creamy, feels velvety on the lips and demonstrates outstanding comfort. Fashion Lip Rouge additionally contains an extensive complex of active constituents that further enhance its capability for skin care and protection. Acetylated Vitamin E and Avocado Oil provide for moisture regulation of the skin. Multi-active, natural alpha-bisabolol, obtained from chamomile, contributes anti-inflammatory effects, making it one of the many beneficial constituents of this Lip Rouge.

The color nuances LP 601 to LP 658 belong to the iridescent color category. All these Lip Rouge colors feature bewitching pearlescent for special effects.

The KRYOLAN Lip Rouge assortment includes a total of 108 colors - which truly satisfies all the expectations of make-up professionals.

Glamour Lip

A translucent cream to be applied as a final application for brilliant lips.

Art. 9020 Details 4 g

Lip Glisser

A cream with excellent adherence for a lasting gloss effect. Lip Glisser is available in a variety of attractive colors. The gloss effect is enhanced by iridescent pigments.

Art. 5220 Details 8 g

Lip Shine Circle

A creamy lip gloss, containing silicone, for brilliant and lustrous effects with protective and soothing vitamin additives.

Art. 5226 Details 25 g

High Gloss Brilliant Lipshine

High Gloss Brilliant Lipshine provides lips with a special, attractive, and unmistakable gloss. Lips made up with High Gloss reflect light with a sophisticated and shimmering sheen. It assures either dramatic or natural appearance, depending on the color shade.

High Gloss is characterized by great wearing comfort. It is light and makes possible soft and supple lips. It is not sticky.

Art. 5214 Details 4 ml

Lip Make-up

Lip Gloss

Lip Gloss can be the final touch for an eye-catching look. Lip Gloss is available in transparent and in a wide range of exciting and attractive colors to emphasise an exceptional beauty make-up. Lip Gloss transparent provides a long-lasting, clear-gloss effect over any lip rouge. Lip Gloss Glitter creates magical sparkle effects. Lip Gloss in highly pigmented shades can be used to provide a shiny and colored lip make-up.

Available as transparent and translucent versions, and in the colors shown.

Wet Make-up Body Make-up Face and Body Painting

The creation of color make-up designs on face and body, known as body painting, has become increasingly popular and has achieved a high level of appreciation. In particular, body painting has attained significant status in artistic photography and in advertising. This new art form has even become a hobby for many participants.

Now as always, face and body make-up is essential in the realization of many theatrical roles and of certain dramatic characters.

It is safe to assume that KRYOLAN Aquacolor wet make-up is the most widely used body make-up. Aquacolor is a highly color-intensive compact make-up available in a particularly extensive assortment of colors. In addition to the many Aquacolor matt skin and vivid colors, metallic and iridescent color shades are also available.

Aquacolor is also suitable for beauty application, as many make-up artists in various parts of the world appreciate a waterbased, oil-free foundation providing an excellent coverage. Especially in sunny territories, Aquacolor often is welcomed as an alternate beauty foundation giving a natural, matt look.

The preparation KRYOLAN Liquid Body Make-up is highly effective for application over large areas of the body. Liquid Body Make-up is also available in matt as well as in sparkling colors.

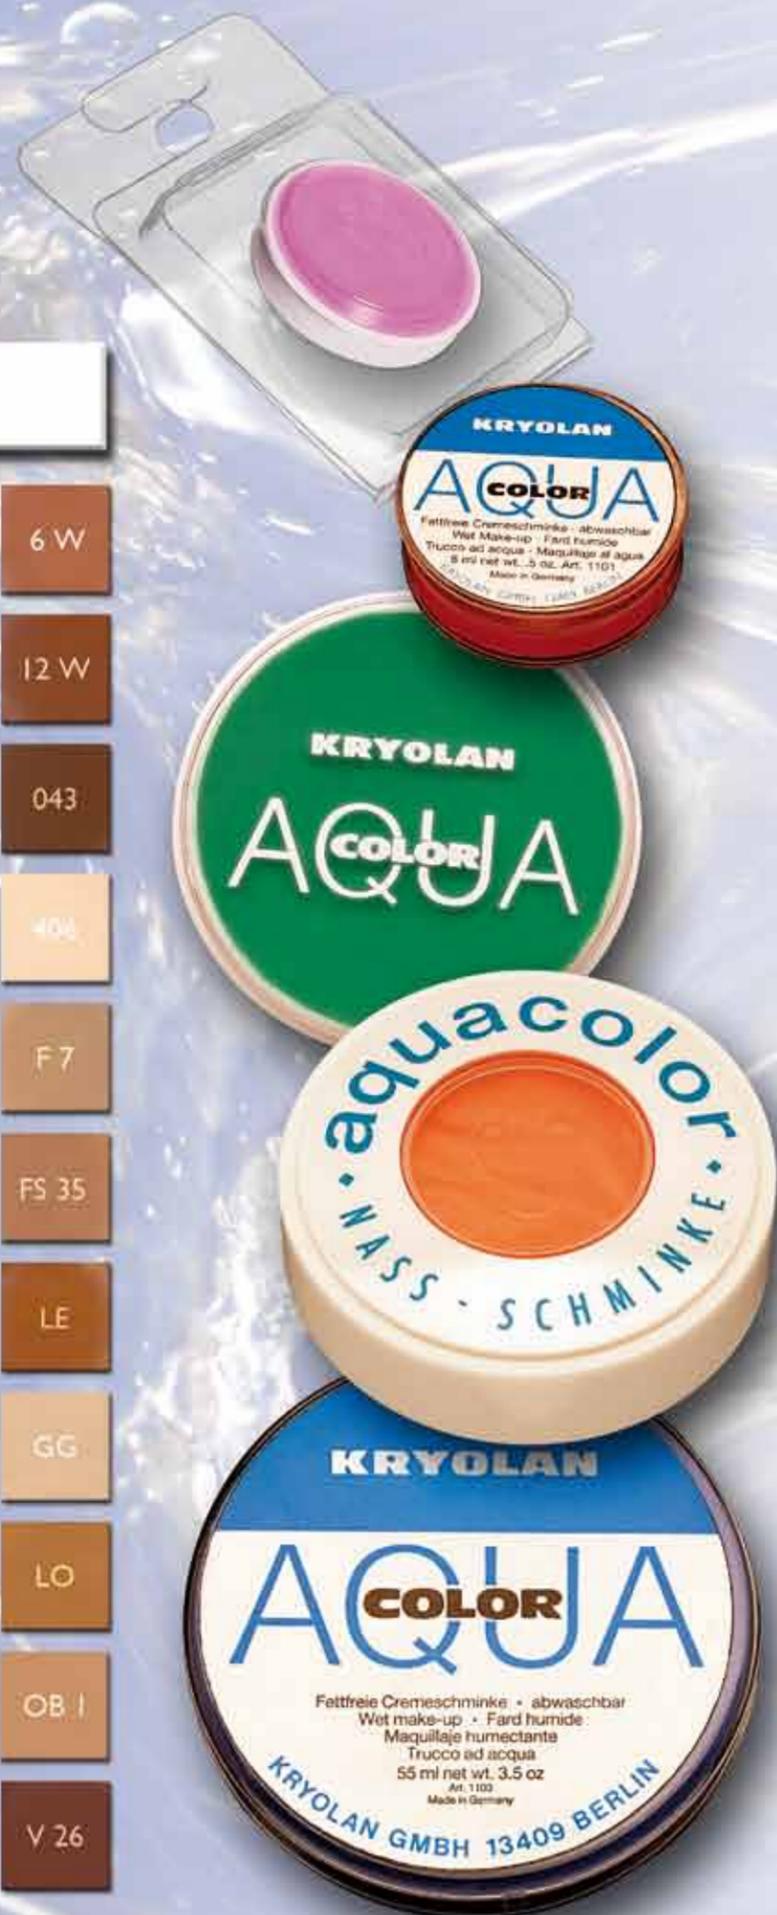

KRYOLAN also offers Aquacolor Liquid, an intensive-color make-up emulsion, as an additional variation. These preparations are also available in an extensive color assortment.

KRYOLAN also offers an extraordinary product under the name Liquid Brightness, for delicate sparkling effects.

Aquacolor received the seal of Quality Approval from the European Centre for Allergy Research Foundation (ECARF).

Aquacolor

Aquacolor is a glycerin-based compact make-up, especially color-intensive, with the ingredients of superior-quality skin cream preparations. Aquacolor is universally applicable, primarily as a make-up for painting face and body. Application is effortless, with an only slightly moistened make-up sponge or brush. After drying, it can be gently buffed with a soft towel or with the hand - but is not powdered. Setting spray is recommended if the make-up will be subjected to extreme conditions. Aquacolor is extensively smudge-proof and can be easily removed with soap and water. Aquacolor is available in an extensive variety of more than 132 shades, which include skin, vivid and metallic shades. Your KRYOLAN dealer holds a comprehensive color range on stock.

Theater Make-up Cream Make-up

Under the name SUPRACOLOR, KRYOLAN offers an assortment of superior-quality greasepaint preparations that have proved highly effective and widely accepted for decades on the stages of the world.

SUPRACOLOR is a color-intensive cream make-up, which can also be used as a foundation and for fantastic facial color effects. This make-up is especially effective for shadowing and accentuating theatrical character make-up. It's certainly not unusual, however, to use SUPRACOLOR for cosmetic applications.

Its extensive selection of colors and outstanding skin compatibility has made SUPRACOLOR an indispensable product.

As with all other cream make-up products, this product must also be set with effectively absorbing powder. For removal of SUPRACOLOR, we recommend the KRYOLAN products Make-up Remover, Hydro Make-up Remover Oil, or AquaCleans.

Supracolor

SUPRACOLOR is a cream make-up preparation that has proven widely successful for decades. Work in the make-up design departments of professional theaters would be practically unthinkable without SUPRACOLOR. This preparation is well known for its outstanding covering qualities, its excellent skin compatibility and the great assortment of available colors. SUPRACOLOR is successfully used not only for normal make-up, but also for bright color effects. Its characteristics also make it effective for shading and highlighting. The metallic colors offer additional design possibilities.

This Make-up is available in a range of more than 132 shades. Your KRYOLAN dealer holds a comprehensive color range on stock.

Air Brush

A still rather new technique has been added to conventional means of make-up application: air brushing.

Traditionally, the make-up sponge and brush sufficed for application of make-up. Now, the air brush has indeed become a highly appealing application for the specialised make-up artist. Contact free application of make-up with the almost imperceptible medium of air - along with the significant benefits that this method brings - have helped to lead to a rapidly growing interest in this technique.

To successfully apply air brush make-up, it is of course necessary to use specially designed make-up preparations. Just the right liquid foundation, for example, is absolutely necessary - micro-fine in consistency; designed and optimized for the air brush. An appropriate air brush itself, in addition to an effective mini-compressor, is naturally just as essential.

The make-up designer, with these products and this equipment, can skillfully use the new technique of air brushing to achieve exceptionally uniform application of make-up to face and body. On this basis, it is possible to produce make-up transitions with such gentle and softly-drawn appearances with perfect visual results, even for shots with high definition camera technology.

The chemists at KRYOLAN have developed a preparation just for these applications: AIR STREAM Make-up Colors. This new creation for the professional make-up artists was conceived especially for applications in still photography, for video takes and not least for use with high definition TV.

Air Brush

VEGA 2000 Air Brush Set

The Badger VEGA 2000 air brush is a two-way device for professional applications. This proven-successful air brush is highly effective for cosmetics as well as graphics jobs. The VEGA 2000 Air Brush Set contains an air brush with two needles of different sizes, for various types of spray. Needle size 5 has proved most effective for application of air brush make-up. The VEGA 2000 Air Brush Set also includes product jars to attach to the air brush, as well as the connection hose to the compressor.

Art. 62104

TC-501C Air Brush Compressor

A small air compressor for use in air brush work by make-up artists and cosmeticians. The TC-501C produces air pressure of up to 3 bar and enables maximum operational pressure of 1.5 bar, with very low noise emission. A selection of air brushes can be attached to this compressor.

Art. 62201 (not pictured)

Air Brush Cleaning Pot

The Air Brush Cleaning Pot is especially designed for the hygienic cleaning of the air brush. With spraying out unwanted residue from the air brush into the cleaning pot without dispersing product in the air the air remains clean and free from any product excess. It is ideal for very small work spaces with little ventilation. The pot is very easy to clean and includes a built-in air brush holder. Art. 19905 (not pictured)

P-320 Micro Air Brush Gun

The P-320 Micro Air Brush Gun is a two-way device that controls the air and the material flow independently of each other. This air brush gun, equipped with a very fine needle, produces an outstanding spray pattern. It is especially effective for naturally-appearing beauty make-up.

Art. 19901

X-320 Micro Compressor Set

The Micro Compressor Set includes an air compressor and air brush gun. The X-320 Micro Compressor Set was especially designed to apply the KRYOLAN professional beauty make-up products Micro Foundation on Air. This system operates with an extra-gentle air-flow pressure of only 0.5 bar. It is also exceptionally quiet in operation. For mobile work, the X-320 Micro Compressor Set can also be powered with the rechargeable battery pack that is also supplied.

Other air brush guns can also be connected to the X-320 Micro Compressor Set.

Air Brush

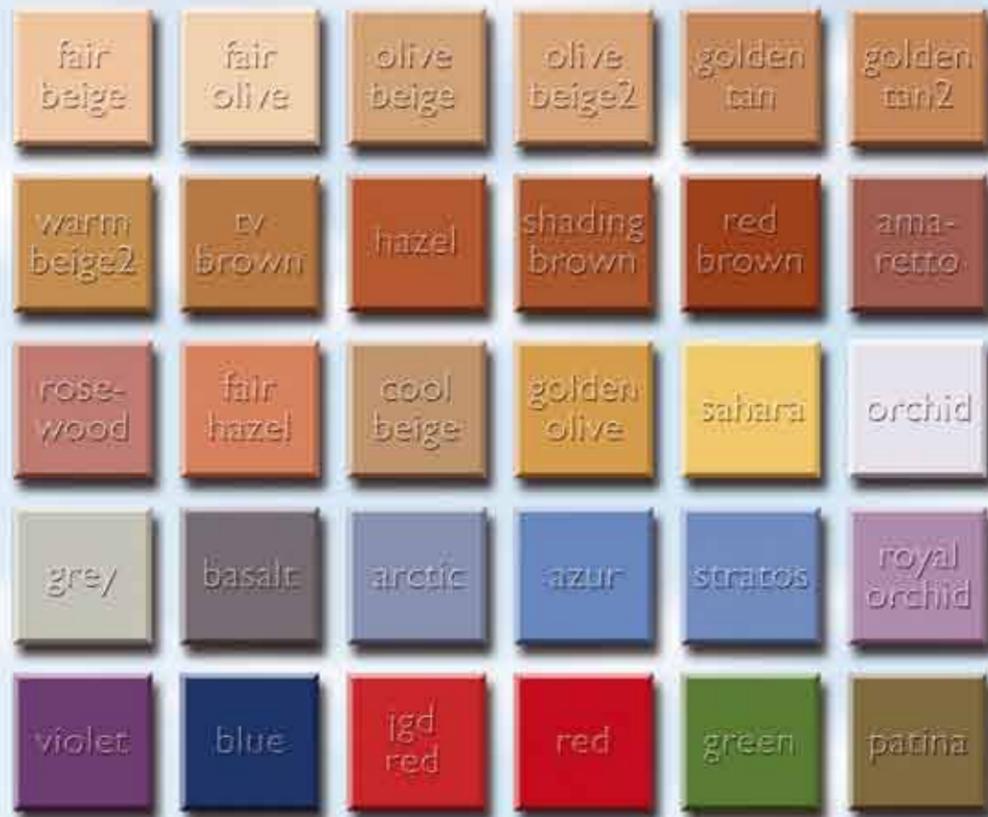

AIR STREAM Make-up Colors

AIR STREAM Make-up Colors GK
for Face and Body

AIR STREAM Make-up Colors K
for Body Make-up

A micronized, fine particle make-up product in an aqueous medium, for application with an air brush. These make-up colors have been designed to be sprayed at very low pressure (less than 0.5 bar) - which means that application process is pleasant for the model.

AIR STREAM Make-up Colors provide the make-up artist for the first time with a professional preparation to achieve make-up results with a uniformity that was previously unimaginable.

The make-up artist sprays AIR STREAM Make-up Colors from a distance of approx. 10- 15 cm. The make-up, applied without contact, dries very fast and is smudge-proof and durable. These products can be easily removed with AquaCleans.

AIR STREAM Make-up Colors are available in an extensive selection of foundation colors - in addition to shading and bright colors for perfect facial make-up. These colors (from the GK line) can of course be also applied to the body.

An additional special line of colors is also available for the body. The colors (from the K line) are also approved by the European Union for use on the face.

Air Brush

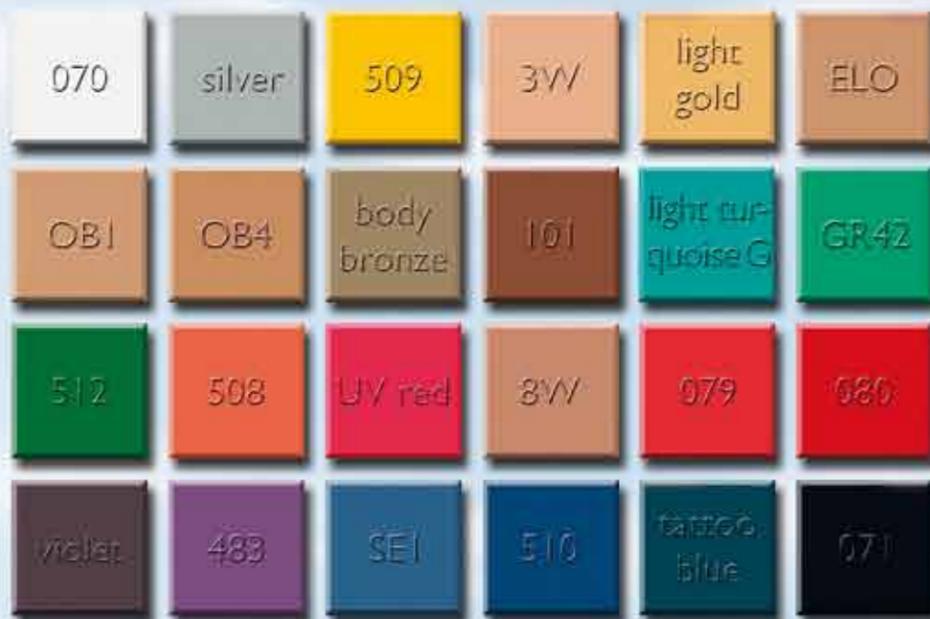

AQUA PROOF

Micronized waterproof make-up in an alcohol medium, for spray-gun application. Aqua Proof is supplied in a wide selection of skin shades and bright colors.

Aqua Proof is designed to be sprayed on at a distance of around 10-15 cm. Applied in this manner, without contact, the make-up dries fast and is then smudge- and water-proof.

Aqua Proof is removed with a mixture of Kryolan MME Mild Spirit Gum Remover and Kryolan Hydro Make-up Remover Oil. This make-up removal mixture is applied to the required area of skin, allowed to act for a short time and is then removed with a soft tissue. Aqua Proof contains alcohol and should not be applied near eyes or mucous membranes.

Micro Foundation On Air

Micro Foundation On Air represents an innovative make-up concept that has been especially developed for high definition, digital TV technology. A foundation provided on the basis of Micro Foundation On Air produces a flawless, streak-free and uniformly distributed surface on the skin. This preparation is sprayed on by means of an air brush gun, without contact and with a maximum pressure of 0.5 bar. The product dries immediately and will not smudge or rub off afterwards. Micro Foundation On Air can be easily removed with AquaCleans.

HIGH DEFINITION

High Definition

“High definition” (HD) is the technical term for high-resolution image quality for advanced digital camera technology. This innovative technology produces a completely new visual experience for television screens. It creates brilliant visual sharpness that approaches cinema quality.

Digital image processing is also leading the way in modern photography. At present, exceptional picture quality can, for example, be achieved at a level of 60 megapixels.

Camera people and photographers are now facing the demanding requirements of advanced HD technology. And make-up artists throughout the world are being challenged to adapt their art to HD.

HD make-up requires a new, exceptionally sensitive way of working. It also demands innovative, micro-fine make-up preparations with unlimited ease of application and covering. Meeting both of these requirements enables perfect make-up with natural, life-like radiance.

KRYOLAN laboratories have accepted the new HD technology challenge to create a new generation of make-up products that meet these demanding requirements.

The new KRYOLAN High Definition range was developed to satisfy the following key criteria:

- Perfect micro-fineness
- Unrestricted application and covering characteristics
- Controlled reflection

It has been designed to allow flawless creation of professional-level HD make-up. Now available for selection:

- Micro Foundation Sheer Tan **
- Micro Foundation Cream *
- Micro Foundation Cache *
- Micro Silk Powder **
- Micro Foundation Matifying Liquid *
- Micro Foundation Smoothing Fluid *
- Micro Foundation Glamouring Flow *
- Micro Shade **
- Cream Liner **
- Living Color **
- Micro Foundation On Air *
- Micro Foundation On Air Spray **
- Micro Foam Cleanser **

As of now 6 products of the KRYOLAN HD range have been tested for skin tolerance and received the Seal of Quality Approval from the European Centre for Allergy Research Foundation, ECARF (* = tested / ** = preparation).

High Definition

Micro Foundation Sheer Tan

A trace of perfect make-up.

A modern foundation for TV, catwalk and today's successful, fashion-conscious woman: translucent, natural, matt, professional, easy to use.

Sheer Tan fulfils all these expectations.

Use a Foundation Brush or an extra fine Latex Sponge to apply this foundation thinly and evenly. The Make-up will set quickly leaving a velvety, powdery feeling and seems to unite with the skin. It provides the skin with a fresh and naturally-appearing complexion shade. The usual powdering is not always necessary.

Sheer Tan is water-resistant, seems flawless even after hours and requires a touch-up rarely.

Sheer Tan may be easily removed with Micro Foam Cleanser or an alternate professional make-up remover.

Art. 19120 Details 35 g

High Definition

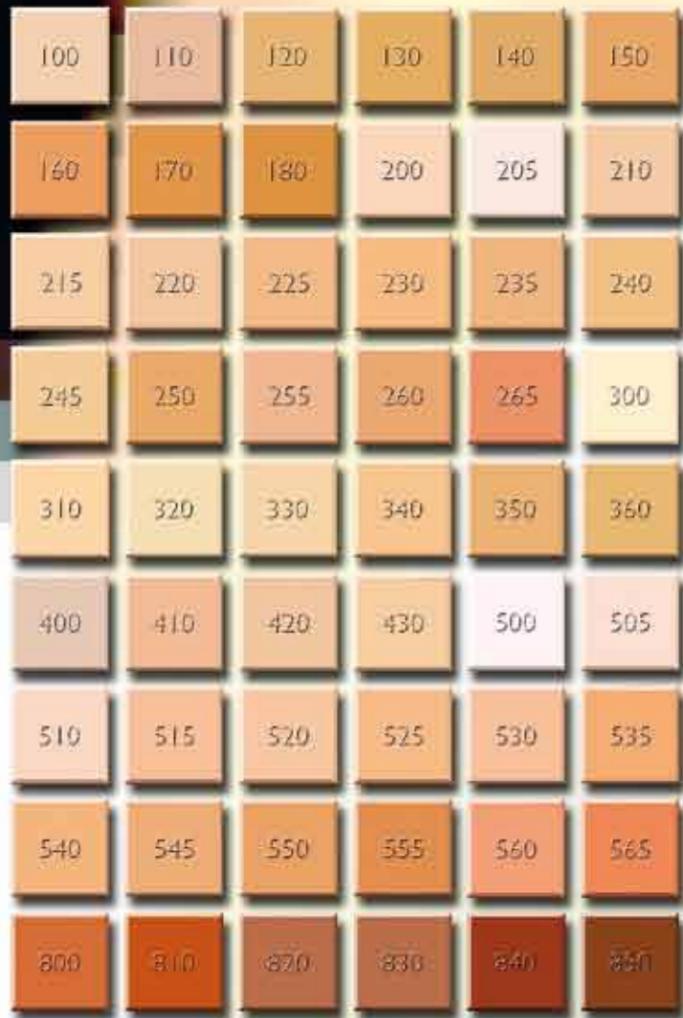

Micro Foundation Cream

Micronized foundation with unique light reflection. Optically, it significantly reduces the shadow effects of wrinkles. Which means that it enables natural, youthful appearance – especially with make-up for high definition camera techniques for film, TV and photography.

At the same time, special ingredients protect the skin from ultraviolet radiation and from harmful environmental influences.

Thinly and evenly apply Micro Foundation Cream with a very fine-pore make-up sponge or foundation brush and set it with Micro Silk Powder.

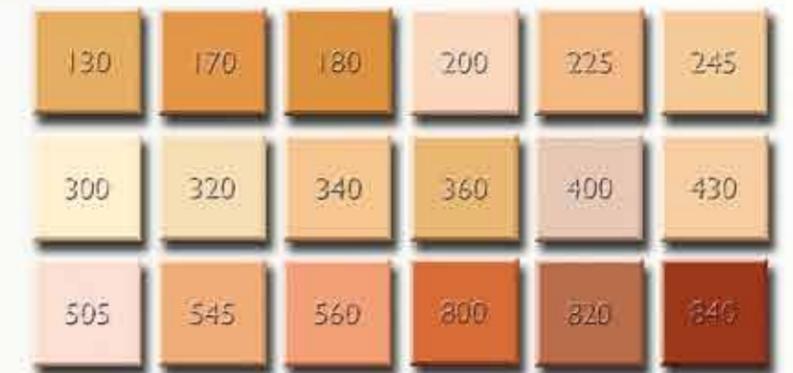

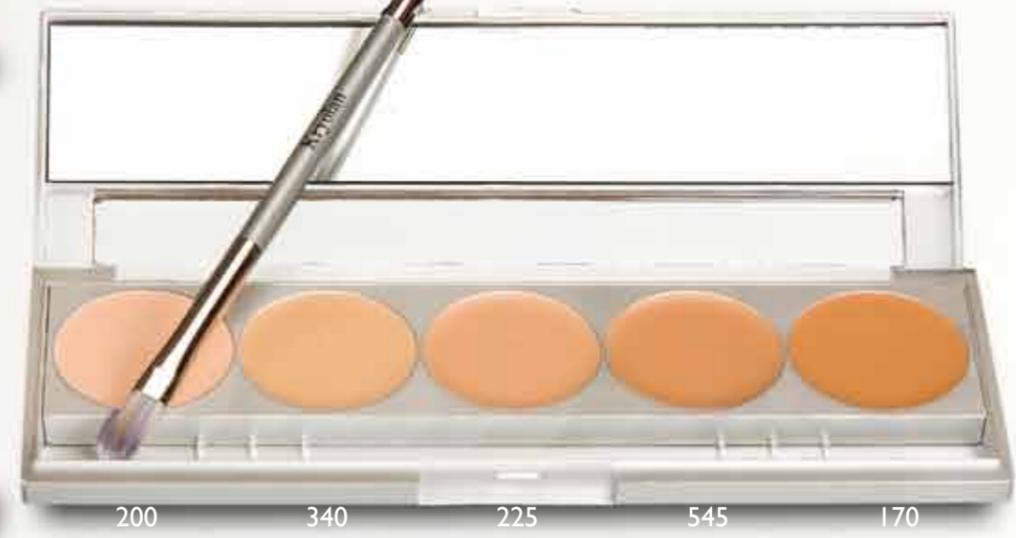

Art. 19001 Details 12 g

Micro Foundation Cache

A special foundation, created with finest, micronized pigments, that delivers an exceptional perfect make-up and also has excellent covering power. Micro Foundation Cache allows corrective make-up application; designated skin areas can be effectively covered. Although this foundation has excellent covering properties, it still appears natural and meets the requirements for high definition images.

- Art. 19011 Details 18 g | Color

Micro Foundation Glamouring Flow

Micro Foundation Glamouring Flow is a micronized ultra-fashionable event make-up. It has been gently enriched with iridescent lustre pigments.

Glamouring Flow can be flawlessly applied with a foundation brush or with a fine-pore sponge. This exceptional make-up, with a silky, glamorous effect, is smudge-proof and moisture-resistant after drying.

Art. 19150 Details 30 ml

Micro Shade

A selection of color nuances for eye shadow, blush and light-and-shadow effects.

Micro Shade is an extraordinary emulsion that can be applied especially smoothly and uniformly. The micronized coloring pigments are embedded in the cream in such a way as to enable plays of color in applications with high definition media. In addition, it achieves an especially natural, elegant appearance.

Art. 19330 Details 5 ml

Cream Liner

Cream Liner is the color intensive choice for a fashionable, perfect eye line, the right make-up for creative ideas. Whenever detailed make-up design is needed and fine lines are in the focus. Cream Liner does not drip, is most comfortable to use and water-resistant. The lasting effect makes this product especially suitable for the professionals. Available in an air-tight, elegant acrylic jar.

Micro Foam Cleanser

Micro Foam Cleanser is an innovative make-up remover with mild, rich, and fine-pore foam that gently and thoroughly removes all kinds of make-up.

First shake the product container vigorously, administer the foam by pumping onto a make-up removal cloth, then apply it to the skin area for make-up removal. Next, remove the make-up with a clean cloth or cotton-wool pad. Final revitalization with SURGIVA Refreshing Spray, clear water, or Skin Tonic is recommended.

After make-up removal, the skin feels noticeably soft, smoothed, and gentle.

Art. 19662 Details 180 ml

Make-up Removal

With application and wearing of make-up on a daily basis, gentle and skin-friendly removal of make-up is of major importance. Only the purest ingredients, kind to the skin, enable a comfortable feeling with make-up removal preparations that actors, models and consumers expect - quite rightly - from a professional make-up regime.

KRYOLAN make-up removal preparations fulfil these expectations. KRYOLAN has made available a comprehensive and highly diversified line of such products:

- Classical make-up removal preparations in snow-white quality
- Hydrophilic oils and creams that can be easily rinsed off with warm water
- Innovative, oil free liquid make-up remover

Eye Make-up Remover

An exceptionally gentle 2-phase eye make-up remover that especially carefully but thoroughly and reliably removes eye shadow, mascara, eyeliner, kajal, and any other type of make-up.

Intensive shaking of the container causes the active phases to combine to form a homogeneous mixture.

Art. 1671 Details 100 ml

Cleansing Cream

A classical make-up remover cream with an hydrophilic additive, suitable for all cream make-up products.

KRYOLAN Cleansing Cream is evenly applied in circular motion to make-up area. The make-up then gently dissolves from the skin. Make-up and make-up remover can then be rinsed off with warm water.

After removal, the skin feels relaxed and fresh.

Art. 9602 Details 150 g Jar

Cleansing Gel

An effective hydrophilic make-up remover in a tube. The oil in this product has been assimilated into a gel. The remaining film of the make-up remover can be effortlessly removed from the skin with warm water.

Art. 5601 Details 75 ml Tube

Make-up Remover

Traditional snow-white make-up remover for the gentle removal of all cream make-ups.

After removal, the skin feels relaxed and fresh.

Art. 1601 Details 50 g Container
 Art. 1602 Details 120 g Container
 Art. 1603 Details 350 g Container
 Art. 1604 Details 6000 g Theater Pack

Hydro Make-up Remover Oil

A hydrophilic cleansing oil for easy removal of all cream and grease make-up. Hydro Make-up Remover Oil is evenly massaged into make-up areas of the skin, which causes the make-up to gently dissolve. Make-up and Hydro Oil are then easily removed from the skin with warm water. After make-up has been removed, the skin feels fresh and relaxed.

Make-up Removal

AquaCleans

An innovative, oil-free make-up remover, suitable for the removal of all kinds of make-up. Mild cleansing substances assure thorough yet gentle make-up removal, deep down into pores. After make-up removal, clear water or skin tonic can be applied to the skin, for a truly refreshing, invigorating experience.

Tools

Accessories for Make-up Artists

In addition to a sufficient assortment of superior-quality professional cosmetic preparations, along with professional equipment, the make-up designer must outfit herself or himself with the proper accessories to ensure successful work.

Essential in this kit are make-up brushes that satisfy professional demands: products with top-quality hair, first-class craftsmanship, functional design and a good cost-benefit ratio. In short: brushes with outstanding quality.

In this section we are presenting a large number and variety of top-quality professional make-up brushes. They were produced in a likewise great number of cultures and countries - but all were manufactured by craftspeople traditionally trained in the brushmaker's trade.

We are introducing a selection of superior make-up sponges on the following pages: tools that belong to the trade of every make-up artist. They are made of many various materials and come in numerous forms: e.g., natural latex, synthetic rubber, fine-pore synthetic substances, Nolatex® and natural sponge from the depths of the sea.

Our large assortment of tools and accessories means that we are able to provide professional make-up artists with the support essential to their individual and creative work.

The Premium is a complete newly designed series of superior make-up brushes for the most demanding expectations of professional make-up designers. A major innovative feature is the ergonomically formed metal handle. It sits well in the artist's hand and contributes to achieving creative success. This handle does not have a paint finish, which means it does not suffer from the effects of solvent brush cleaner. The brush itself consists of top-quality red-marten bristles (also known as European sable), a superior natural material. Each brush is elaborately packed in acrylic glass.

Torey Make-up Brushes

Top-quality synthetic Japanese fibres are used by carefully selected brushmakers to craft this professional make-up brush. The result is an outstanding make-up brush for many and various applications. One of the chief characteristics of Torey brushes is that they absorb only a little make-up at a time, which means they are economical in consumption of make-up products.
